

ANTONELLI COLLEGE

Tony Carter
Business-Technical
Support

I decided to go to Antonelli College because I had always known about their art programs. I decided to obtain two degrees from Antonelli in graphic design and information technology.

After graduation I worked at Pomeroy IT Solutions for Cincinnati Bell. I would help customers to troubleshoot their internet and cell phone issues. Since then, I have become the Team Lead of email support over four branches of Nestle.

A proud moment for me was speaking on behalf of my department at graduation. I have remained active in the college over the years as a Program Advisory Committee Member and served on the graduate panel as a resource to current students.
