

Chad Payton

TECHNICAL SUPPORT AND NETWORKING
GRADUATION DATE: DECEMBER 2009

Chad chose Antonelli College because of the flexibility of being able to work and go to school at the same time. He realized that Antonelli understood that people sometimes lead a very busy life; whether it's raising a family or just working. He liked the fact that Antonelli College worked around his schedule, and the small class sizes were a major plus. Chad chose his field of study because he had always been into technology and computers, and he knew that the job market for this field would forever be expanding.

"My proudest moment would have to be when I walked across the stage nearly two years ago to receive my degree and being elected "Most Professional" during my externship at Antonelli College."

Chad is currently working at Stennis Space Center at the Enterprise Service Desk Department. His duties include assisting the entire NASA organization in simple computer-related issues such as software issues, login credentials, network connectivity, and printer issues.
