

ANTONELLI COLLEGE

**William F.
Northern Jr.**
Photography

Before I came back to school I was working in a portrait studio and it was the same thing over and over again. I really wanted to venture out on my own and I realized that I needed to go back to school and tighten up my skills before I could start my own business.

I decided to come to Antonelli when I saw how the instructors and the students interacted with each other and the level of hands on work in the classroom. From the minute you walk into the door you are learning. I was already a photographer and I thought I was doing pretty good, but when I came here they started teaching me things that I needed to do to tighten up my shots and make them better.

Since graduation, I am self-employed in photography. My current clients and projects include corporate event photography for Proctor and Gamble, weddings, and family and senior portraits.

I am truly grateful for the experience with Antonelli and wouldn't trade it for the world!
